The 2012 IFPSA Golf Day

By Ken Fletcher Jnr.

With apologies to all Golf Day sponsors and competitors for the delay in bringing this news to you. As has been recently mentioned in the first productions of the

new e-magazine, it has taken some time to get the *e-mag* to the 'full production' stage and the regularity that we wanted – but we're there now and you can expect that the *e-mag* with current news will arrive on your computer monthly in future.

The International Fluid Power Society of Australia's annual Golf Day for 2012 was held at the Lakelands Country Club in Gnaragara. **K ONE FLUID POWER** was the major and Platinum Sponsor for the event and The Society thanks **K ONE FLUID POWER** for once again supporting the day. Many thanks also go to the other sponsors of the day as shown below. This event drew 16 teams and a total of 64 players in the challenge for the **K ONE** trophy previously held by the **Mining & Hydraulic Supplies** 'young guns'.

The format for the event was similar to that of the previous IFPSA annual golf day as a follow-on from the success of that event and the positive comments received after it. An inclusion in this

event was that of each player receiving an IFPSA logo Srixon golf ball at the start of the day. It seems that some players didn't realise that the ball was theirs to keep as they quite rapidly 'donated' it to the shrubbery somewhere around the course!

The shot gun start at 12:30 pm got things going with the IFPSA golfers having the entire course to themselves to complete the 18 hole event. After some significant scrub-clearing by some players, all competitors strolled into the club house bar at the end of the day for welcome refreshments before sitting down to a splendid buffet dinner.

Many thanks go to the staff at Lakelands Country Club for permitting The IFPSA to hold the event at their beautiful club and for their assistance in planning and making it a most enjoyable occasion for everyone.

The event saw the use of the **Peoria** handicap system for the second time and it again made for an exciting results sheet when it came to determining the winners and grinners! The system uses a number of holes to work out a team's handicap for the day based on that day's play.

Only 10 points separated all teams with handicap scores ranging from the winners on 68.0 to the last placed NAGA team on 78.4. A big *thank you* goes to retired, former IFPSA committeeman, **Brian Hill**, for acting as an independent scoring overseer.

Team JMV Hydraulics won the day and congratulations to the well-known *Volk tribe* from **JMV Hydraulics** for scoring a net 68.0.

Congratulations also to second placed **Team Sandvik** with a score of 69.2 and third placed **Team Hydco** with a score of 70.8. For the first time ever, the NAGA went to our major sponsor's team - **Team K ONE FLUID POWER**.

Having had the privilege of playing with **Dave Hepburn**, General Manager of **K ONE FLUID POWER**, I know this is most unlikely to occur again!

.....and lastly but certainly not least of all, THANK YOU to all competitors for supporting the event – without you, it'd all be a waste of time!!
